Wed, 13 Jun 2018 19:44:00 GMT - A plane is simply a glorified jig for holding a chisel and a specific angle. The important aspects of a plane are the length and flatness of the sole, weight, blade angle and shape, clearance at the mouth, and (for comfort's sake) the tote and knob. Length of sole: The length determines the type of work the plane will most often be used for.

If this equation is expanded, we obtain the general equation of a plane of the form $ax + by + cz + d = 0$ Note!! To write the equation of a plane in 3D space, we need a point on the plane and a vector normal (orthogonal) to the plane.
